EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew Curtin on 11/7/05.

Claim 16 has been amended as follows:

16. (currently amended) A method for blind joint channel estimation and signal detection in a communication system including a plurality of channels for transmitting symbols, comprising:

estimating the plurality of channels using symbols received from the plurality of channels;

maintaining, concurrently, multiple estimates of the plurality of channels using a parallel list Viterbi algorithm;

selecting a best channel from the estimated plurality of channels, the best channel having a minimum path metric and correct evolution; and

detecting symbols received only on the best channel while updating the best channel in a single pass, wherein the updating is delayed after detecting the symbols on the best channel, the delay being less than ten symbols to reduce isolated high value noise that can diverge the updating of the best channel.

Art Unit: 2637

2. Claims 1-3 and 5-16 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Parr et al. disclose a system for blind channel estimation as described in the previous Office action, but does not disclose that the estimating means includes a best channel selector connected to an output monitor, the detecting means includes a multiple channel selector coupled to an output of a minimum path metric determiner, and a switch connected to the best channel selector and the multiple channel selector, configured to connect an input signal to the estimating means and the detecting means, as recited in claim 1.

Parr et al. further fail to disclose a method for channel estimation where a best channel updating is delayed after detecting the symbols on the best channel, the delay being less than ten symbols to reduce high value noise that can diverge the updating of the best channel, as recited in claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David B. Lugo whose telephone number is 571-272-3043. The examiner can normally be reached on M-F; 9:30-6.
